Reports of Serious Injuries After COVID Vaccines Near 112,000, as Pfizer Asks FDA to Green Light Shots for Kids 5 to 11

VAERS data released Friday by the CDC included a total of 778,685 reports of adverse events from all age groups following COVID vaccines, including 16,310 deaths and 111,921 serious injuries between Dec. 14, 2020 and Oct. 1, 2021.

By Megan Redshaw

Data released Friday by the Centers for Disease Control and Prevention (CDC) showed that between Dec. 14, 2020 and Oct. 1, 2021, a total of 778,685 adverse events following COVID vaccines were reported to the Vaccine Adverse Event Reporting System (VAERS). The data included a total of 16,310 reports of deaths — an increase of 373 over the previous week.

There were 111,921 reports of serious injuries, including deaths, during the same time period — up 6,163 compared with the previous week.

Excluding "foreign reports" filed in VAERS, 593.728 adverse events, including 7,437 deaths and 47,455 serious injuries, were reported in the U.S. between Dec. 14, 2020 and Oct. 1, 2021.

Of the 7,437 U.S. deaths reported as of Oct. 1, 11% occurred within 24 hours of vaccination, 16% occurred within 48 hours of vaccination and 29% occurred in people who experienced an onset of symptoms within 48 hours of being vaccinated.

In the U.S., 393.4 million COVID vaccine doses had been administered as of Oct. 1. This includes: 227 million doses of Pfizer, 152 million doses of Moderna and 15 million doses of Johnson & Johnson (J&J).

From the 10/1/2021 release of VAERS data:

Found 778,685 cases where Vaccine is COVID19

Table

Event Outcome	Count	Percent
Death	16,310	2.09%
Permanent Disability	23,712	3.05%
Office Visit	121,304	15.58%
Emergency Room	57	0.01%
Emergency Doctor/Room	87,758	11.27%
Hospitalized	75,392	9.68%
Hospitalized, Prolonged	213	0.03%
Recovered	242,522	31.15%
Birth Defect	528	0.07%
Life Threatening	17,618	2.26%
Not Serious	336,659	43.23%
TOTAL	† 922,073	† 118.41%

† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 778685 (the number of cases found), and the Total Percentage is greater than 100.

The data come directly from reports submitted to VAERS, the primary government-funded system for reporting adverse vaccine reactions in the U.S.

Every Friday, VAERS makes public all vaccine injury reports received as of a specified date, usually about a week prior to the release date. Reports submitted to VAERS require further investigation before a causal relationship can be confirmed.
Historically, VAERS has been shown to report only 1% of actual vaccine adverse events.

This week's U.S. data for 12- to 17-year-olds show:

- 21,298 total adverse events, including 1,284 rated as serious and 22 reported deaths. Two of the 22 deaths were suicides.

  The most recent death involves a 16-year-old male (VAERS I.D. 1734141) who reportedly died from cardiac failure five days after receiving Pfizer's COVID vaccine.

Other recent deaths include a 17-year-old male (VAERS I.D. 1689212) with cancer who was vaccinated April 17, tested positive for COVID on July 20, was hospitalized and passed away Aug. 29; and a 16-year-old female (VAERS I.D. 1694568) who died from a pulmonary embolism nine days after receiving her first Pfizer dose.

- 3,202 reports of anaphylaxis among 12- to 17-year-olds with 99% of cases attributed to Pfizer's vaccine.
- 520 reports of myocarditis and pericarditis (heart inflammation) with 508 cases attributed to Pfizer's vaccine.
- 114 reports of blood clotting disorders, with all cases attributed to Pfizer.

This week's U.S. VAERS data, from Dec. 14, 2020 to Oct. 1, 2021, for all age groups combined, show:

- 19% of deaths were related to cardiac disorders.
- 56% of those who died were male, 43% were female and the remaining death reports did not include gender of the deceased.
- The average age of death was 72.8.
- Of the 2,935 cases of Bell's Palsy reported, 50% were attributed to Pfizer vaccinations, 42% to Moderna and 8% to J&J.
- 648 reports of Guillain-Barré syndrome, with 40% of cases attributed to Pfizer, 32% to Moderna and 28% to J&J.
- 1,976 reports of anaphylaxis where the reaction was life-threatening, required treatment or resulted in death.
- 158,280 reports of symptoms of anaphylactic reactions with 43% of cases attributed to Pfizer's vaccine, 49% to Moderna and 7% to J&J. An anaphylactic reaction may include various symptoms like skin rashes, nausea, vomiting, difficulty breathing or shock.
- 9,907 reports of blood clotting disorders. Of those, 4,286 reports were attributed to Pfizer, 3,595 reports to Moderna and 1,975 reports to J&J.
- 2,737 cases of myocarditis and pericarditis with 1,733 cases attributed to Pfizer, 888 cases to Moderna and 106 cases to J&J's COVID vaccine.

ORDER TODAY: Robert F. Kennedy, Jr.'s New Book — 'The Real Anthony Fauci'

Young mother pressured to receive COVID vaccine dies of vaccine-induced blood clots

Jessica Berg Wilson, a 37-year-old stay-at-home mother from Washington passed away suddenly on Sept. 7 from vaccine-induced thrombotic thrombocytopenia (VITT) — a rare, and sometimes fatal, blood-clotting condition — after receiving J&J's COVID vaccine.

Robert F. Kennedy Jr
@RobertKennedyJr

In exclusive interview w/ #TheDefender, Jessica Berg Wilson's husband + uncle share devastating story of Jessica's death, which was attributed to vaccine-induced thrombotic thrombocytopenia caused by J&J COVID vaccine.

On Aug. 29, Jessica went to a Seattle pharmacy to get her COVID vaccine and was told she would be receiving J&J's shot. She was "vehemently opposed" to taking the vaccine, "considering her stay-at-home mom status, state of good health and young age in conjunction with the known and unknown risk of an unproven vaccine," her husband said.

But Jessica was pressured to get the vaccine due to a vaccine mandate at their child's school requiring "room moms" who wished to serve in the classroom be fully vaccinated.

According to Jessica's VAERS report (VAERS I.D. 1683324), she experienced blood clots in her ovarian and renal veins, and a brain hemorrhage that led to tissue damage. Although doctors tried to relieve the pressure on her brain by performing a craniotomy, they were unsuccessful.

Jessica was ultimately pronounced brain dead, removed from life support and passed away. Doctors confirmed the cause of death was VITT.

Pfizer asks FDA to authorize emergency use of its COVID vaccine for 5- to 11-year-olds

Pfizer and its German partner, BioNTech on Thursday asked the U.S. Food and Drug Administration (FDA) to authorize their COVID vaccine for emergency use for children 5 to 11 years old. The FDA advisory committee is scheduled to meet Oct. 26 to discuss Pfizer's pediatric COVID vaccine.

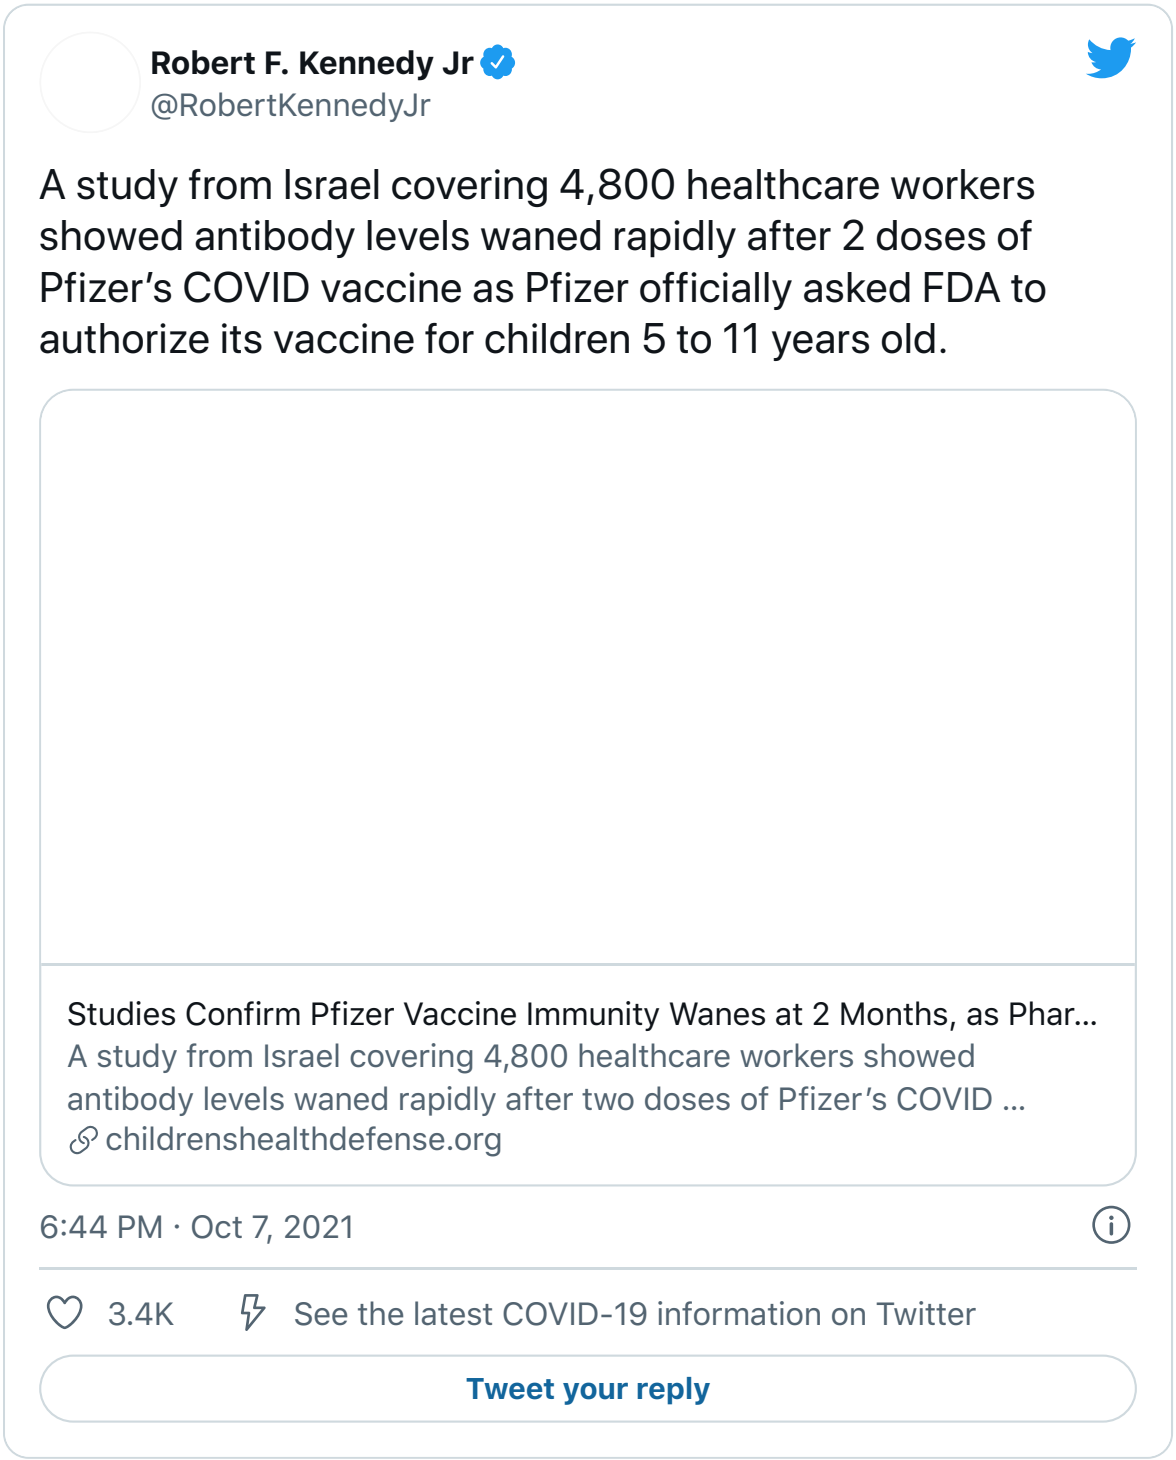
FDA officials said once vaccine data for younger children was submitted, the agency could authorize a vaccine for younger children in a matter of weeks, but it would depend on the timing and quality of the data provided.

Pfizer and BioNTech submitted initial data to the FDA last month for a regimen of two 10-microgram doses in children — one-third the amount given to older patients — but had not formally requested authorization until now.

According to Pfizer's Sept. 20 press release, the trial didn't show the vaccine reduced hospitalizations or even mild cases. But it did reveal side effects generally comparable to those observed in participants 16 to 25 years of age.

Studies confirm Pfizer vaccine immunity wanes at 2 months

As The Defender reported, two studies published Wednesday in the New England Journal of Medicine confirm any immune protection offered by two doses of Pfizer's COVID vaccine drops off after roughly two months.



Robert F. Kennedy Jr
@RobertKennedyJr
A study from Israel covering 4,800 healthcare workers showed antibody levels waned rapidly after 2 doses of Pfizer's COVID vaccine as Pfizer officially asked FDA to authorize its vaccine for children 5 to 11 years old.

A prospective longitudinal study from Israel covering 4,800 healthcare workers showed antibody levels waned rapidly after two doses of vaccine "especially among men, among persons 65 years of age or older and among persons with immunosuppression."

A second study from Qatar looked at actual infections among the nation's highly vaccinated population, who mostly received Pfizer's COVID vaccine. Estimated effectiveness against SARS-CoV-2 infection was negligible for the first two weeks after the first Pfizer dose, increased to 36.8% in the third week after the first dose, and reached its peak at 77.5% in the first month after

the second dose.

By months five five through seven, researchers said vaccine efficacy reached a low level of approximately 20%. Pfizer has consistently claimed the company's own efficacy data demonstrate 95% efficacy against SARS-CoV-2, which was not observed in this study.

Sweden, Denmark and Finland pause Moderna vaccine over concerns of myocarditis

Sweden, Denmark and Finland will pause the use of Moderna's COVID vaccine for younger age groups after reports of possible rare side effects, including myocarditis.

Robert F. Kennedy Jr
@RobertKennedyJr

Sweden will pause Moderna's COVID vaccine for people under age 30, while Denmark said it will halt use of Moderna's vaccine in people under age 18.

Finland on Thursday paused the use of Moderna's COVID vaccine for younger males due to reports of myocarditis, joining Sweden and Denmark in limiting its use after a Nordic study involving Finland, Sweden, Norway and Denmark found men under the age of 30 who received Moderna's vaccine had a slightly higher risk than others of developing myocarditis.

All four countries said they would instead give Pfizer's vaccine to men born in 1991 and later, despite research that shows a similar risk of myocarditis associated with Pfizer's vaccine.

Fully vaccinated patient sparks COVID outbreak among vaccinated population

A paper published Sept. 30, in Eurosurveillance showed a fully vaccinated patient in a hospital setting rapidly spread COVID to fully vaccinated staff, patients and family members — despite a 96% vaccination rate and use of full personal protective equipment.

Of the 42 cases diagnosed in the outbreak, 38 were fully vaccinated with two doses of Pfizer and BioNTech's Comirnaty vaccine, one had received only one vaccination and three were unvaccinated.

Of the infected, 23 were patients and 19 were staff members. The staff all recovered quickly. However, eight vaccinated patients became severely ill, six became critically ill and five of the critically ill died. The two unvaccinated patients had mild COVID cases.

The authors said the study challenges the assumption high universal vaccination rates will lead to herd immunity and prevent COVID outbreaks, as 96.2% of the outbreak subjects were vaccinated, infection advanced rapidly and viral load was high.

Fully vaccinated countries had the highest number of new COVID cases

In a study published Sept. 30 in the peer-reviewed European Journal of Epidemiology Vaccines, researchers investigated the relationship between the percentage of population fully vaccinated and new COVID cases across 68 countries and 2,947 U.S. counties that had second dose vaccine, and available COVID case data.

The study found "no discernible relationship" between the percentage of population fully vaccinated and new COVID cases. In addition, the most fully vaccinated nations had the highest number of new COVID cases, based on the researchers' analysis of emerging data during a seven-day period in September.

Children's Health Defense asks anyone who has experienced an adverse reaction, to any vaccine, to file a report following these three steps.

How long are people going to fall for this global HOAX? The criminality is astonishing! Forcing anyone to wear a mask is wrong. It is Medical Tyranny! Forcing young children to block their breathing apparatus, while their little brains are still developing - is CHILD ABUSE of the worst kind! Parents should be ashamed of themselves!!!

For the last 18 months I asked myself the same question.

For me it's just totally mind freaking boggling, like being on a bad acid trip where you find

For me it's just totally mind freaking boggling, like being on a bad acid trip where you find yourself being thrown into the middle of a**Twilight Zone** episode where a totalitarian world government rules over all aspects of your life, and decides when you die.

I have seen so many close family and friends **Soma-nized**(brainwashed) by their social media sites and the MSM, unquestionably, obediently and religiously following the incessant mantra that vaccines are 'safe and effective' and make sure 'You Vaccinate and keep your family, friends and community safe'!

Many of them when aware that I will not comply, even after I have given them factual data from VAERS about the record breaking injuries and deaths caused by these jabs, have decided to de-friend me and my family since I refuse to believe their lied-base 'science'.

So i wonder can they really be awaken? Perhaps the best we can do is pray God help them.

Reply • Share ›

SibyllasStuff • 17 hours ago

I read through some of what is reported about the shot that is now being pushed for younger and younger ages and people are dying after getting this jab. And these scientists go on and on about statistics - and political entities talk of a reset. I have to wonder, when is enough enough. I am grateful for what the Children's Health Defense is doing. This whole crazy regime with fake sets getting a shot on TV insisting that those who choose to be healthy are the bad guys. really - who is running this show?

The criminals at pfizer must be stopped. There is no reason to give anyone under the age of 50 these horrible mRNA injections, especially kids. They are doing this to force the FDA to include these injections in the regular yearly vaccination parade. Simply beyond human. I continue to warn my daughter and her grandchildren never to get any of these injections.

7 Reply • Share ›

Jake Green ↗ Ektor • 4 hours ago

There's NO reason to give anyone, no matter their age these EXPERIMENTATL mRNA gene therapy inoculations. The alleged virus has never been proven to exist by isolation, purification, from a sample taken from an alleged infected person.

And it seems to be a genuinely "bipartisan" operation. Years ago, a wise observer of our chronic, suicidal progressivism, Sam Francis, denominated the two parties as *The Evil Party* and *The Stupid Party*. Needless to say that, since then, they have intermingled in so many ways that a new designation is needed for The UniParty. Any suggestions? If it was a corporation, it would be very easy: *Pestilence, Inc.*

This isn't addressing the 5 week process during which time people are considered "unvaxxed" when there are more cases, deaths and adverse events - and they lump them under unvaxxed status. I figure many of these hospitalized at that time might be vaccine adverse events.

5 Reply • Share ›

TyroneB ↗ ME MCC • 2 hours ago

That's just the tip of the iceberg. The under-reporting factor is fairly high. This video from Steve Kirsch helps to explain it...

Meanwhile, Fauci lectured a group of McGill university students in Montreal, Canada last Friday where he declared that Americans should 'give up' individual freedom for the 'greater good' of society. Henry Kissinger in a speech to the World Healh Organization Council in Feb 25, 2009 announced his plan for the world: "Once the herd accepts mandatory forcible vaccination, it's game over! They will accept anything - forcible blood or organ donation - for the 'greater good'. We can genetically modify children and sterilize them - for the 'greater good'. Control sheep minds and you control the herd. Vaccine makers stand to make billions, and many of you in this room today are investors. It's a big win-win! We thin out the herd and the herd pays us for providing extermination services. Now, what's for lunch?" ~ Henry Kissinger

4 | • Reply • Share ›

atlasy Jennifer • 10 hours ago

and since when did Fauci give up anything for anyone ...he is gaining and getting richer ! how is it that he can get away with this and why is this continuing after all the deaths ...so many ow how can this not be known by now

4 | • Reply • Share ›

Jennifer atlasy • 3 hours ago

There was just a study from out of Israel that showed natural immunity is 13 times better than vaccinated immunity, but Fauci conveniently skirts around the natural immunity question. Natural immunity doesn't make the drug companies, Fauci and Gates and investors billions at the expense of the Untermenschen.

Step back and analyze the situation. VAERS is a pacifier to keep us vocal unvaxxed occupied and nothing more. The VAERS numbers grow each week as do the vaxxs. Those that should pay attention to the injuries/deaths don't. If it had real meaning and was a threat to the goons, it would have been shut down already.

It has no value until it is evidence a judge uses to rule against the atrocities that are going on. I see no sign of that ever happening.

VAERS reports processed as of 10/01/2021 - Reported Miscarriages
Reports Up **+44** this week.
Notes:
- VAERS has known limitations, issues, non-reporting, etc.
- Plot tracks total reported miscarriages as they are added each Friday
- The lower plot shows reported miscarriages for all vaccines, 2000-2020
- The 2021 data point is COVID vaccines only
- Data is for 'ABORTION SPONTANEOUS' only

- Data is for "ABORTION SPONTANEOUS" only

1 ^ | v • Reply • Share ›

TyroneB • 17 hours ago

Notice the uptick in the curve. These are mainly "breakthroughs" from the elderly that received a vaccine a longer time ago.

VAERS reports processed as of 10/01/2021

COVID Vaccine Cumulative Reported Deaths

Shows report data from eight weeks: 2/5, 3/12, 4/16, 5/21, 6/25, 7/30, 9/3, 10/1

Notes:

- VAERS has known limitations, issues, non-reporting, etc.
- **Thin** Green band shows VAERS **annual** vaccine deaths 1990-2020 Min/Max
- CDC data point on 1/13 with 113 reported deaths; current deaths up to 1/13 ~240
- VAERS Deaths reported with no 'Date of Death' listed not included (778 w/no date)
- VAERS Report Search lists 7,437 USA deaths and 16,310 USA+Foreign
- Overlaid weekly reported total USA deaths (USA+Foreign not shown)
- REF: VAERS Data Sets / VAERS Data Search, VAERS reports as of 10/01/2021
- REF: CDC mm7008e3-H, 2/26/21 (1st month vaccine safety monitoring report)

see more

"A prospective longitudinal study from Israel... showed antibody levels waned rapidly after two doses of vaccine..."
"A second study from Qatar... (showed that Pfizer vaccine's) effectiveness against SARS-CoV-2 infection was negligible for the first two weeks after the first Pfizer dose, increased to 36.8% in the third week after the first dose, and reached its peak at 77.5% in the first month after the second dose."
Two different species of hominids?
Same with AIDS incidence: 90% men / 10% women in America and Europe. But 50% / 50% in Africa.
But this way (long lasting antibodies) is not how a real vaccine works . According to the Encyclopaedia Britannica: "Once stimulated by the vaccine, the antibody-producing cells, called B lymphocytes, remain sensitized and ready to respond to the agent should it ever gain entry to the body."

1 ^ | v • Reply • Share ›

Mary Nelson • 20 hours ago

Please skip ALL vaccines for at least one year to see how infections reduce or increase.
My reading looks like they are mostly a waste of money with probable side effects.

"The data come directly from reports submitted to VAERS, the primary government-funded system for reporting adverse vaccine reactions in the U.S."

Of a truth, the data is sent to VAERS, but according to a whistleblower from the CMS system, VAERS is severely throttling it.

And many data reporting streams are throttled at the hospital level where doctors refuse to make the reports because there are no consequences for not doing so. Some doctors have complained it takes too much time, 30 minutes to report one case. Others have been threatened from reporting vaccine adverse events from losing their licenses by the AMA or their jobs by the Hospitals.

There appears to be severely choked off vaccine adverse reaction reporting from the doctors, nurses, Health Care Providers all the way to VAERS itself. Dr. McCullough has complained that VAERS rejected 30 of his reports. He made that comment months ago.

Dr. Ryan Ardis, who is involved with legal challenges to the vaccine mandates and is familiar with the CMS whistleblowers affidavit has estimated that at least 200,000 have died in the US along, following COVID gene therapy injections.

I'm getting pretty tired of the weekly coverup put out by VAERS. It's just sickening. They are so deeply corrupt. The CDC, FDA, HHS, NIH, NIAID are badly in need of an investigation by an independent council.

There are four problems with almost all COVID reports:

(1) The vaccines do not prevent infections.
Therefore the "case" count is not relevant for comparisons.
In addition, I would imagine that most people after taking
a vaccine would have little interest in getting tested
unless they had respiratory symptoms. And I believe
the CDC recommends a PCR CT of 28x for vaxxed people
which would result in fewer false positives
than the 35x to 40x for unvaccinated people.
Calling someone a "case" who has no respiratory symptoms

is not how health care professionals operated pre-2020.

(2) VAERS data should always include the warning that from 90% to 99% of adverse side effects are never reported.

(3) VAERS data should include the warning that reported side effects are not necessarily due to the vaccines, especially if they happened more than a few days later.

(4) VAERS data do not yet include long term adverse side effects, and it may be very difficult to ever know if those long term medical problems were related to the vaccines.
